Vaulting

The Wednesday Group is going from strength to strength, helped by Margaret Green, Holly and Julia and with the huge benefit of Walford indoor School.

Riding and Driving

All sessions have suffered seriously from the weather conditions since the Christmas break. There have been a huge number of cancellations which is always sad both for the volunteers and for the riders and drivers who really look forward to their weekly sessions.

Linda and Sarah from the Mount Gilbert School in Telford who, along with Jamie have joined the Friday afternoon riding sessions.

Happy Birthday to you! Happy Birthday to you!

Aries
21 March - 20 April Arians have a tendency to act like a dynamo of energy when they set their mind on achieving some goal. They can sometimes act so quickly that they later discover that they should have put in just a little more thought before starting. Action and achievement are important! Aries may step on your toes. Aries enthusiasm rubs off onto others and they get involved in something, others are ready to follow. Selfishness, which sometimes includes a need to control others, tarnishes their otherwise positive and adventurous spirit. They need to have empathy and concern for the needs of others. As a lover, they are passionate, giving and enterprising.

Avril Pluck 6th April

Taurus
21 April - 21 May The warm-hearted Taurus is equipped to listen to someone's problem and then give them the advice they need. They are patient and very persistent in arriving at their goal in life. In fact, they are so stubborn that once they've made up their mind about something, nothing short of a nuclear bomb can change it. With friends and mates, they tend to be jealous and possessive. However, Taurus will lavish emotional and financial attention on friends and loved ones to a fault.

Vanessa Gibson 22nd April

Mandy Wright 1st May
Joy Dolton 3rd May
Claude Hart 11th May
Lindsey Green 18th May

Gemini
22 May - 21 June The fear of boredom propels most Geminians into almost constant activity and participation. They have a need to communicate and stretch their mind with ideas and this is demonstrated with a schedule of activities that would wear-out anyone else. They take pride in using their logical and mental abilities in solving problems and performing tasks. Geminians tend to know a little about a lot of different subjects but not to any depth. This makes them somewhat superficial, however, this is the quality that gives them the adaptability for many varied tasks.
